VENUE: Ankara

ORGANIZATOR: Gazi University

DEADLINE OF SENDING DOCUMENTS: 15th January 2014

All food and accommodation and visa costs will be covered. Travel expenses will be covered by 70%.

The Summary Of Project

One of the most important questions for people is determining how the problem solving process is running. The general belief for mathematics is too difficult to understand. But on the other side, we all have to use the mathematics to survive our lives. When we are shopping, cooking, organizing our daily time schedule... These are some of the basic routines for a human. The other side of the picture shows that we have responsibilities to our families, to the society and to each other. For example, we have to think about our children future and make some organization for their future. Why don't we use mathematics to see the future better? Surely, we use it automatically. But we don't use it effectively. So, this causes the unsolving problems for the future. Critical and analytical thinking is the key point at that moment which is an important fact to be succeeded. Life is full of problems for everyone and every society. The only clever method is finding solutions together with analytical thinking and trying to do something with using creativity.

Our aim is with this project, to bring young people together with using the mathematical methods, games and applications. We will sometimes use mathematics in music, art, sport and drama. We focus on bringing people together and enable the cultural exchange with the help of mathematics. This will also help the young people to improve their analytical thinking and self-expression. They will see how fun mathematic is and decrease the fear of maths with all these kind of activities and come together without any borders. This project aims to be an example to emphasis the connection between formal and non-formal education. The methods can be also used for children after the project. Let's have fun together with mathematics...

The Organizations of The Project

- | | |
|---|-------------|
| 1. Gazi University | Turkey |
| 2. Stichting Diversiteitsland | Netherlands |
| 3. Cooperativa Sociale C & C Onlus | Italy |
| 4. Dulus Foundation | Spain |
| 5. Be Enriched | England |
| 6. Compass Európaifjúsági Közösségért Egyesület | Hunary |
| 7. Social Innovation Centre | Latvia |
